

Medhavi Jogi

MD

Dr. Jogi is a true native Texan, having been born in Austin and attending the University of Texas for his undergraduate education. He completed his medical training at the prestigious Baylor College of Medicine in Houston spending the last several years of training actively involved in academic research, publishing several well-received papers and a textbook chapter as well as winning numerous academic awards.

His current interests include managing all forms of thyroid disease by offering the newest techniques and using the most up-to-date research which was developed while training at the world-renowned MD Anderson Hospital. As a double board certified endocrinologist he also has specialty training in the management of diseases of the pituitary, pancreas, bone, ovaries/gonads as well as adrenal glands. He is an active member of numerous national endocrinology societies including the American Thyroid Association, American College of Clinical Endocrinologists, Texas Medical Association, Harris County Medical Society and the American Thyroid Association.

He spends his time taking care of his beautiful daughters with his wife, a successful Houston dermatologist. He is well-recognized by his patients for having an amiable disposition and a warm bed-side manner which is most noticeable in the care he takes to explain every aspect of their disease and treatment.
