

Joel S. Kneitz, M.D.

Dr. Kneitz loves to help patients take charge of their health concerns and problems. His management style is hands-on and prefers to act as a coach to help make a difference in his patients' lives.

He will assure that you are fully engaged in making a difference in your health care, that you understand your medications, and will follow your progress carefully. Internists are the masters at coordinating multiple medications and subspecialists, helping to resolve conflicting issues and medications. They are often the place to start and coordinate simple or complex care.

Dr. Kneitz earned his medical degree from University of Texas Medical School in Houston and completed his residency in Internal Medicine at Baylor College of Medicine in Houston. He previously worked at the St. Luke's Health Center on San Felipe for four years. After a brief detour to practice in Fredericksburg, Texas, he and his colleagues have been at the St. Luke's Medical Clinic since it opened in October 2007.
